

Cinis sends another shipload of potassium sulfate

Cinis Fertilizer has sent another shipload of premium quality water soluble potassium sulfate to its customer Van Iperen International. The cargo amounts to just over 3,900 tons.

The production ramp-up at Cinis Fertilizers' facility in Köpmanholmen continues and now the next shipload of water-soluble potassium sulfate has been shipped. The produced potassium sulfate has been continuously tested by both internal and external laboratories, with the conclusion that the shipload meets the quality requirements for water-soluble potassium sulfate. The load amounts to just over 3,900 tons.

"After the production and logistics disruptions around the turn of December/January, production in recent weeks has been without quality deviations and we are pleased that the traffic congestion in the port is now approaching an end so that we can deliver more shiploads," says Jakob Liedberg, CEO of Cinis Fertilizer.

About Cinis Fertilizer

Cinis Fertilizer is a Swedish green-tech company producing an environmentally friendly mineral fertilizer, potassium sulphate (SOP), by, among other things, recycling waste streams from the manufacture of batteries and battery materials, as well as from the pulp industry and other industries. The patent protected technology will use half as much energy as today's production methods and the result is a fertilizer with low carbon footprint, a unique and circular contribution enabling sustainable agriculture. FNCA Sweden AB is Certified Adviser. For further information please visit: www.cinis-fertilizer.com.
