

Cinis has sent a fully loaded ship with potassium sulfate

Cinis Fertilizer has sent another shipload of water-soluble potassium sulfate to its customer Van Iperen International. The cargo amounts to just over 4,200 tons.

The production ramp-up at Cinis Fertilizers' facility in Köpmanholmen continues and now the next shipload of water-soluble potassium sulfate has been shipped. The produced potassium sulfate has been continuously tested by both internal and external laboratories, with the conclusion that the shipload meets the quality requirements for water-soluble potassium sulfate. The load amounts to just over 4,200 tons.

"We are pleased to be able to deliver increasingly larger volumes ahead of the upcoming European growing season. We can also note that the temporary congestion in the port is finally over and the risk of it occurring again is considered minimal," says Jakob Liedberg, CEO of Cinis Fertilizer.

About Cinis Fertilizer

Cinis Fertilizer is a Swedish green-tech company producing an environmentally friendly mineral fertilizer, potassium sulphate (SOP), by, among other things, recycling waste streams from the manufacture of batteries and battery materials, as well as from the pulp industry and other industries. The patent protected technology uses half as much energy as today's production methods and the result is a fertilizer with low carbon footprint, a unique and circular contribution enabling sustainable agriculture. FNCA Sweden AB is Certified Adviser. For further information please visit: www.cinis-fertilizer.com.
