

Cinis has delivered another full shipload of potassium sulfate

Cinis Fertilizer has sent another shipload of water-soluble potassium sulfate to its customer Van Iperen International. The cargo amounts to just over 4,000 tons.

The production ramp-up at Cinis Fertilizers' facility in Köpmanholmen continues and now the next shipload of water-soluble potassium sulfate has been shipped. The cargo amounts to just over 4,000 tons.

In accordance with the new action plan to increase the plant's capacity, the company's technology and process supplier has been on site in Örnköldsvik during April. During this period, we have jointly carried out a number of efforts to optimize the process as well as tests that have resulted in production levels being slightly lower at times.

About Cinis Fertilizer

Cinis Fertilizer is a Swedish green-tech company producing an environmentally friendly mineral fertilizer, potassium sulphate (SOP), by, among other things, recycling waste streams from the manufacture of batteries and battery materials, as well as from the pulp industry and other industries. The patent protected technology will use half as much energy as today's production methods and the result is a fertilizer with low carbon footprint, a unique and circular contribution enabling sustainable agriculture. FNCA Sweden AB is Certified Adviser. For further information please visit: www.cinis-fertilizer.com.
